- Creating visually appealing spaces in your deck
- Ready for coating & installation
- Supporting Australian families
- Non-arsenic & termite resistant

QLD SPOTTED GUM

QLD IRON GUM

QLD BLACKBUTT

QLD IRONBARK

QLD BLONDES

Baywood responsibly sources hardwood logs from sustainable properties throughout Central to Southern QLD.

These logs are processed at their mill in Granville QLD (Fraser Coast).

The hardwood is then machined into many popular decking & screening sizes including: 40x40, 42x19, 65x19, 86x19, 135x19, & 140x25.

ICONIC Hardwood Decking is excellent value for money, easy to install and offers the charming look and feel of natural timber that just can't be replaced.

Unlike plastic and steel, timber is the world's most environmentally-friendly building product. It is natural, reusable, recyclable and sustainable. Being 100% Australian timber, it is a refreshing alternative to imported rainforest timbers like Merbau.
