PARKSIDE STRUCTURAL & JOINERY

Strong One Day, Beautiful the Next

PARKSIDE TIMBER has a proud history of producing some of the finest quality hardwood timber products for generations and Parkside's F27 Structural and Joinery products are an integral part of Parkside's reputation.

PARKSIDE STRUCTURAL and JOINERY products are graded to the highest Australian Structural grade of F27 so you know the quality of hardwood is second to none. Their versatility allows the product to not only be used for structural applications but also now with our internal joinery grade this product is perfect for decorative internal and externally exposed applications where compromising is not an option.

PARKSIDE F27 STRUCTURAL and JOINERY products are typically produced using two of Australia's most loved and recognised timber species - Ironbark and Spotted Gum.

PARKSIDE'S technology utilises laser eye defect scanning technology to help eliminate natural errors in sawmilling and ensure consistency of high quality product. Over the past few years substantial investment has been injected into drying practices and kiln drying technology, ensuring all aspects of the sawmilling practices are cutting edge.

These procedures and cutting edge technology creates a product that exceeds the Australian Standards for F27 products and allows customers not to only use this product in Structural applications but also internal joinery applications where consistency of product is imperative.

PREMIUM GRADE STRUCTURAL and JOINERY

PARKSIDE STRUCTURAL and JOINERY products are available in grades to suit your application - internal Joinery dried to 12% MC or F27 structural seasoned to 15 - 18%. Due to PARKSIDE'S state of the art sawmilling practices, and high quality standards, PARKSIDE STRUCTURAL and JOINERY products are naturally produced to be above the Australian Standards for F27 products.

This means the products overall quality and consistency is greater than the standard comparison product and hence the product can be used for so many different applications. This is also why PARKSIDE STRUCTURAL and JOINERY Products only come in one grade.

PARKSIDE STRUCTURAL and JOINERY BENEFITS

PARKSIDE STRUCTURAL and JOINERY products boast a number of natural benefits over competing and substitute products in the market place –

- PARKSIDE products are grown in Australia, produced and manufactured in Australia for Australian conditions
- PARKSIDE F27 STRUCTURAL is naturally insect and decay resistant and with an ACQ H3 treatment used to help prevent any durability concerns with sapwood inclusive products.
- PARKSIDE have some of the highest standards and best quality sawmilling technology in the Southern Hemisphere, meaning their quality is second to none.
- PARKSIDE F27 STRUCTURAL is all durability class 1 above ground; giving you peace of mind your product will hold its structural integrity for over 40 years!
- PARKSIDE F27 STRUCTURAL has a Joint Strength rating of 1 (JD1), and when compare to competing structural products like LVL13 and engineered pine which are typically a JD3 or JD4.

- PARKSIDE STRUCTURAL has beautiful hardwood grain and texture, so no two pieces are ever cosmetically the same, allowing customers to enjoy a truly unique experience
- PARKSIDE F27 STRUCTURAL and JOINERY products have exceptional integrity from their durability to their tangential shrinkage factors, so you know if you require consistency, these products are right for you.
- PARKSIDE products are available in fire retardant species, specifically complying with AS3959, and BAL ratings, all you have to do is ask.

Some of the applications for PARKSIDE STRUCTURAL and JOINERY Products include but are not limited to:

- External Deck Joists
- Exposed Beams
- Large Lintels
- Appearance Beams internally and externally
- Truncated girder Trusses
- Waling plates
- Benchtops
- Tabletops
- Stair case material
- Other Internal Joinery applications like Windows, doors, panelling and cabinetry
